

Sips UK | Commercial Case Study

Residential ■ Commercial ■ New House Builds ■ Extensions ■ Garage/Annex ■ Leisure ■ Roofs

Architect/Main Contractor

Blue Forest

Client

Longridge Training Centre

Site Location

Marlow, Buckinghamshire

Project Type

Commercial (Leisure)

Build Cost

£124,000

Services

- We had to liaise with the architect and our structural engineer to produce a set of manufacturing drawings as well as Calcs for Building Control.
- Manufacture the external SIP wall panels and internal stud wall sections along with the SIP roof panels.
- Supply roof trusses, floor joists and decking.
- Deliver to site and erect the external Sips panels and internal stud walls.
- Fit floor joists and decking.
- Fit SIP roof and trusses (the roof was stepped). The first section of roof used our Sips roof panels which cantilevered some three meters creating a large balcony area, the remaining two sections used conventional roof trusses.
